

Peter Driscoll, M.Ed.

Building Trust in Schools

William Glasser Institute BASIC INTENSIVE TRAINING

This training is designed for three purposes. To improve skills in building relationships, to learn how to resolve problems in a peaceful, responsible way, and to develop leadership skills.

Many people who complete this training say that the most notable outcome is the improvement in their personal relationships. Teachers who use these ideas in their classrooms, find that the learning environment becomes energized by the support students give to one another.

Using a systemic approach to leadership, participants will learn to see problems as people's best attempts to gain control of their lives and to develop ways of leading more effectively while enhancing the leadership skills of others.

Workshop Leader

Peter is a Math Coach, working in Detroit, Michigan. He has been a faculty member of the William Glasser Institute since 1998. <http://www.peterdriscoll.net>

Choice Theory / Reality Therapy Certification

This workshop is conducted in conjunction with The William Glasser Institute and is the first in a five-phase course of study leading to Choice Theory/Reality Therapy Certification.

Introduction offered Day 1

If you are interested in an introduction to the work of Dr. William Glasser, you may attend just the first day of training.

Payment Options

Please send full payment with your registration, or a \$100 deposit with the balance due at the workshop. Alternative billing arrangements can be made by request. Purchase orders are accepted.
